DIAGNOSIS & MEDICAL CONDITIONS

PRIMARY DIAGNOSIS: Acute Appendicitis with Peritonitis

ICD-10: K35.2

EMERGENCY SURGICAL CASE

International Classification: Appendicitis, Acute, with Peritoneal Abscess

- Secondary Condition 1:** Localized Peritonitis – inflammation of the peritoneum secondary to perforated appendix (ICD-10: K65.0)
- Secondary Condition 2:** Post-operative Fever – managed with IV antibiotics (Cefoperazone + Sulbactam), resolved by Day 3
- Secondary Condition 3:** Mild Dehydration on Admission – corrected with IV fluid therapy (Normal Saline + Ringer's Lactate)
- Comorbidity:** Nil. No pre-existing conditions disclosed or observed. Patient was previously healthy.
- Nature of Condition:** Acute onset, first presentation, NOT a pre-existing condition. No history of prior abdominal surgery or chronic GI illness.

CLINICAL SUMMARY & TREATMENT NARRATIVE

Presenting Complaint (10-Aug-2026, 22:45 hrs): Mr. Rajesh Kumar Sharma, a 35-year-old male, presented to the Emergency Department with a 12-hour history of severe, progressively worsening pain in the right iliac fossa, associated with nausea, two episodes of vomiting, and low-grade fever (38.2°C). No prior history of similar symptoms.

Investigations on Admission: Complete Blood Count revealed leukocytosis (WBC: 18,400/mm³). Serum CRP elevated at 142 mg/L. Ultrasound abdomen confirmed thickened, non-compressible appendix (diameter 10.2 mm) with periappendiceal fluid collection. Contrast-enhanced CT (CECT) Abdomen confirmed acute appendicitis with localized perforation and periappendiceal abscess formation.

Surgical Procedure (11-Aug-2026): Emergency Open Appendicectomy performed under General Anaesthesia by Dr. Priya Mehta at 02:30 hrs. Intraoperative finding: perforated appendix with pus collection in the right iliac fossa. Peritoneal lavage performed. Drain placed. Surgery duration: 65 minutes. Patient tolerated procedure well.

Post-operative Course: Patient shifted to General Ward post-recovery. IV antibiotics (Cefoperazone-Sulbactam 1.5g TID) continued for 72 hours. Drain removed on Day 3 (13-Aug-2026). Fever resolved. Tolerating oral liquids and diet by Day 3. Wound healthy with no signs of infection.

Discharge Condition: Stable, afebrile, ambulatory. Drain removed. Discharged on 14-Aug-2026 with oral antibiotics (Amoxicillin-Clavulanate 625mg BD × 5 days) and analgesics. Advised rest for 2 weeks. Follow-up appointment scheduled on 28-Aug-2026.

ITEMIZED HOSPITAL BILL (AS REQUIRED UNDER SECTION 1 & SECTION 3 OF MEDICAL INSURANCE CLAIMS POLICY)

Description	Period / Qty	Rate (INR)	Amount (INR)
A. Room & Boarding Charges			
General Ward – Bed Charges	4 Days	2,500 / day	10,000
Nursing Charges (24-hour care)	4 Days	1,200 / day	4,800
Diet Charges (IV + Oral)	4 Days	500 / day	2,000
Sub-total: Room & Boarding			16,800
B. Doctor's Professional Fees			
Surgeon's Fee – Dr. Priya Mehta (Emergency Appendectomy)	1 Procedure	–	18,000
